

- AGC settings per mode (CW, SW, ..)
- System menu settings optimized per mode, save restore of several settings
- System menu display on screen (as help text) based on ui\_menu\_structure.c help texts
- external program to manage settings
- (CW) filter center frequencies follow sidetone pitch. Sidetone down to 400 Hz, same for center frequencies
- system menu undo or cancel (or fall back to last saved config)
